▶ 16-Channel Serial I/O Cable Assembly

C²I² Systems manufactures and sells a family of Serial I/O Adapters and Boards in the PMC, PCI-104, PCI and cPCI formfactors. Certain versions of these adapters employ front panel I/O.

In such cases, a cable is required to provide physical access to the serial I/O signals available on the front panel connector of these serial I/O adapters and the corresponding serial data terminal equipment.

Figure 1: Serial I/O Cable Assembly

The I/O cable assembly consists of a 160-pin Molex connector (Part No. 71624-3000) on the adapter side which branches out into 16 cables of nominally 2,0 m in length with male DE-9 connectors on the terminal equipment side.

The cable is configured with:

Channels 1 to 8: RS-232 DE-9 Male.

Channels 9 to 16: RS-232 and RS-422 DE-9 Male

Part Number	Grade	Length
CCII/LCP/50-CCM/020/IND	Industrial	2,0 m

Other cable configurations on request.
