**About the Company**

CCII Systems (Pty) Ltd (C<sup>2</sup>I<sup>2</sup> Systems) is a company specialising in real-time systems development and especially data communications for real-time systems. These capabilities are applicable to the system architecture and implementation of complex, distributed, real-time control and management systems. Along with capabilities in the areas of software engineering and system integration, C<sup>2</sup>I<sup>2</sup> Systems is well placed to provide effective solutions to any organisation's information engineering requirements.

The company has recently built its own brand new corporate premises in Kenilworth situated in Cape Town's southern suburbs. These consist of purpose-designed offices and facilities totalling 860 m<sup>2</sup> for offices for up to 50 members of staff, a development laboratory area, a system integration area, a high-tech electronic production area including a PCB conformal coating facility, boardrooms and strong room.

**Facility Features**
